Dear Public Hearing Participant:

On June 20, and 21, 1990, the State of Arizona will conduct public hearings in Phoenix and Tucson concerning a hazardous waste management facility for Arizona. In order to provide all citizens the opportunity to voice their feelings about the proposed permits for the Mobile facility, I have directed the Department of Environmental Quality to hold these special hearings and to extend the public comment period an additional 90 days.

It is my hope that you will assist me in ensuring that these public hearings proceed as intended--as forums of sincere and orderly communication. It is vital that all citizens be afforded the opportunity to voice their concerns, have their sentiments duly recorded, and be assured their ideas will be considered before any decision is made by the State regarding permits.

Your position among Arizona's environmentally concerned voices is a prominent one, and I respect your dedication and involvement in this process. I look forward to a successful hearing and, meanwhile, I remain

Sincerely,

ROSE MOFFORD
Governor
